✂ TASK 3: Creating the Home Page in AEM

This task involves creating the **Home Page** using **OOTB components**, ensuring it's correctly structured with the **Header, Footer, and Teaser Component for an award ceremony**.

Task 3 Objectives:

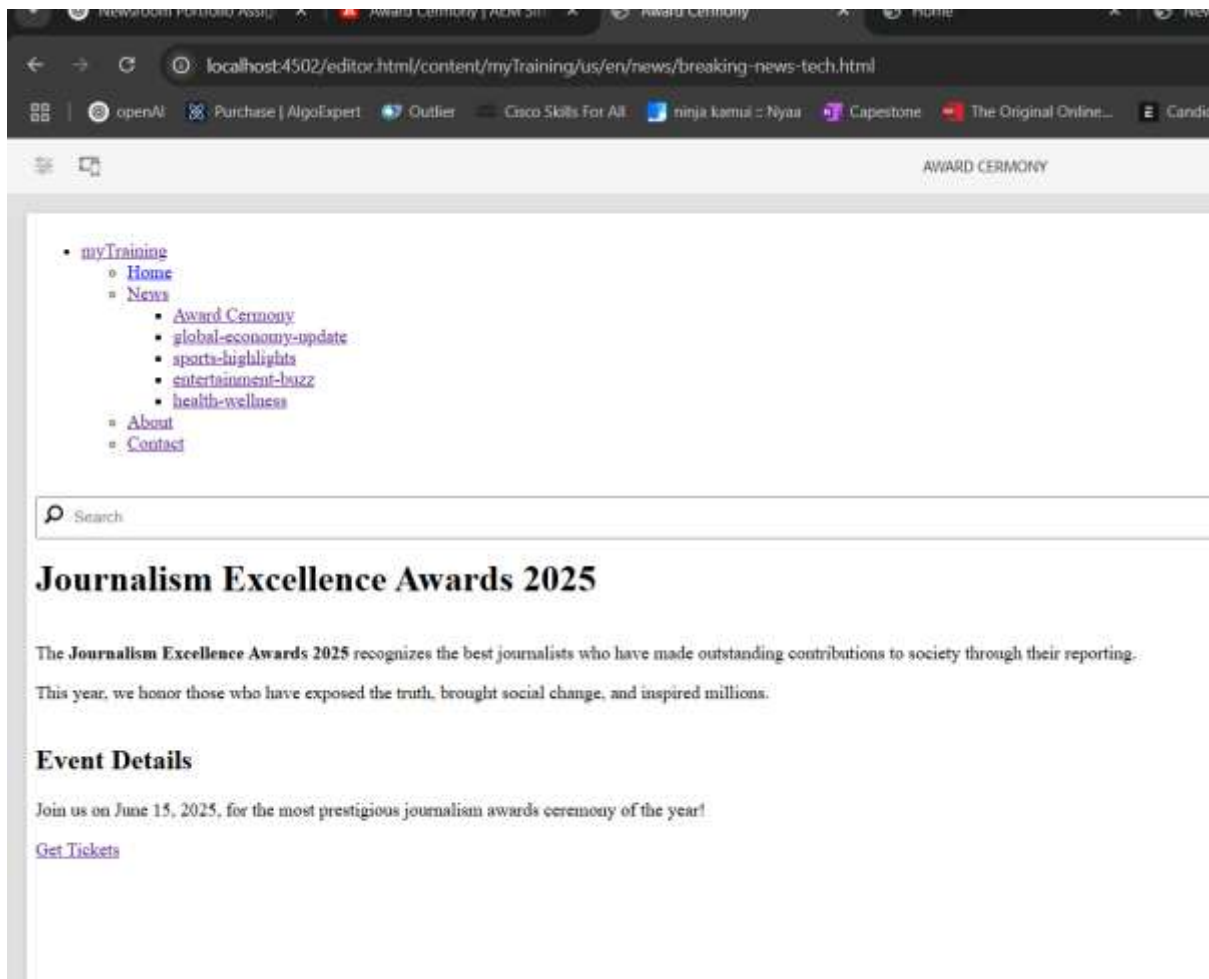

1. Create the **Home Page** (/content/newsroom/home).
2. Use the **OOTB Content Page Template**.
3. Ensure the **OOTB Header and Footer** are applied (so they appear on all pages).
4. Add a **Teaser Component** to showcase an **Award Ceremony** for journalists.
5. Include a **CTA (Call to Action)** linking to the **Award Ceremony page** (/content/newsroom/awards).

Home Page:

News component

AEM Final Task

The image shows a screenshot of an Adobe Experience Manager (AEM) interface with a 'News' form modal open. The modal has a title bar with a question mark icon and a close icon. The form contains several fields: 'News Headline' with the text 'Groundbreaking AI Innovation Reshaping Journalism', 'NEWS Detail Article' with the text 'he latest advancements in artificial intelligence are revolutionizing newsrooms worldwide, enhancing efficiency in content creation and verification.', 'News Image' with a file selection icon, 'News Publish Date' with the date '01 April, 2025' and a calendar icon, and 'News Titles' with a text input field. At the bottom of the modal are 'Cancel' and 'Done' buttons. The background shows a blurred view of the AEM workspace with a sidebar and a main content area.

Task 5: Contact Me Page

In this task, we will create a **Contact Me** page where users can find contact details and social media links of the journalist.

AEM Final Task

Task 6: About Me Page

In this task, we will create the **About Me** page using the **Journalist Component**, which will provide details about the journalist.

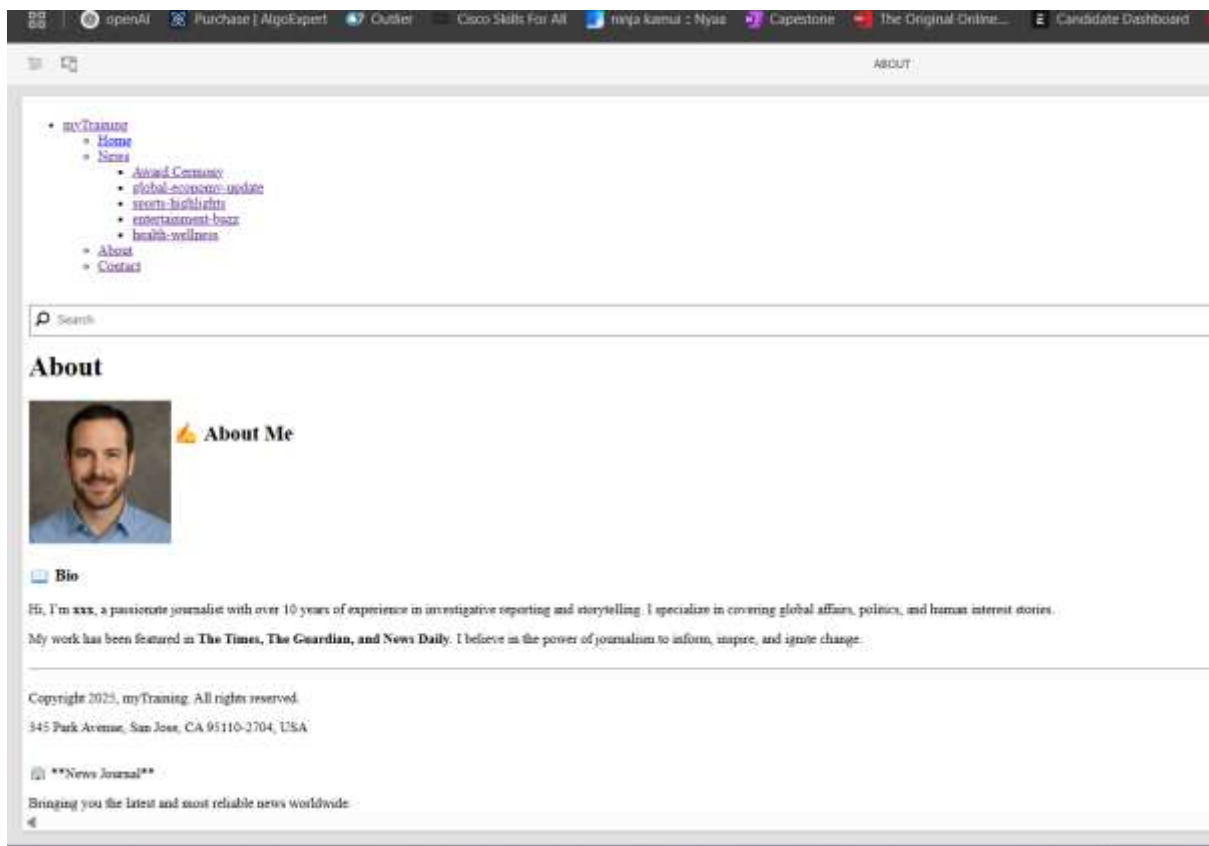

✦ Steps to Create the About Me Page in AEM

📌 Create the About Me Page

1. Go to **AEM > Sites**
2. Navigate to **/content/newsroom**
3. Click **Create > Page**
4. Choose **Content Page (OOTB Template)**
5. Name it **About Me** (/content/newsroom/about-me)
6. Click **Create & Open**

AEM Final Task

About Me Page

Task 7: Verifying News Article Pages

Now, we need to ensure that the **News Article Pages** are correctly created and that the **NewsRoom Component** is fetching and displaying them properly on the News Page.

📌 Steps to Verify News Article Pages in AEM

☑️ Check If News Article Pages Exist

1. Go to **AEM > Sites**
2. Navigate to **/content/newsroom/news**
3. Ensure that multiple **news articles** exist under this path, such as:
 - /content/newsroom/news/article-1
 - /content/newsroom/news/article-2
 - /content/newsroom/news/article-3
4. If they don't exist, **create them** using the **Content Page (OOTB Template)**.
