## DATE : 25-03-2025

Steps to Check:

- Go to **AEM Start → Tools → Workflow → Models**.

- Check if the **"my custom workflow"** is listed.

- Open it and ensure the **custom workflow process step** is configured properly.

- Trigger the workflow on a page by:

  - Navigating to **Sites → Select a Page**.

  - Click on **Page Properties → Start Workflow** and choose your custom workflow.

- **Check Logs**: o   Open AEM **error.log** (crx-quickstart/logs/error.log).

  - Look for log statements that print the **page title**.

2.   Verify Event Handler Execution

Steps to Check:

- Perform an action that triggers the event (e.g., creating, modifying, or deleting a page or an asset).

- **Check Logs:** o   Open error.log and look for log messages related to the resource path.
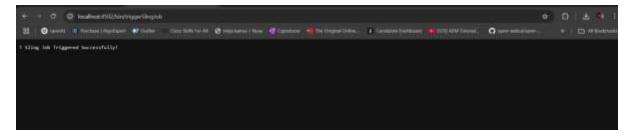

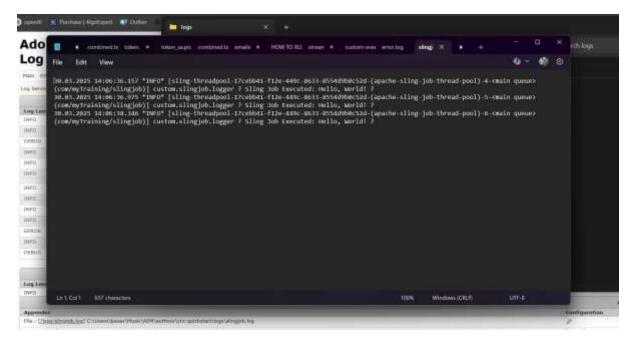

3.   Verify Sling Job Execution Steps

to Check:

- Go to **AEM Start → Tools → Operations → Jobs**.

- Ensure your custom **Sling Job** is listed.

- **Check Logs:**

  o   Open error.log and look for **"Hello World"** message.

Error.log

4.   Verify Scheduler Execution Steps

to Check:

- Wait for **5 minutes** after deploying the scheduler.
- **Check Logs:** ○ Open error.log and look for **"Yellow World"** printed at every 5-minute interval.

Expected Output in Logs:

Yellow World printed by Scheduler

5.   Verify User Group & Permissions

Steps to Check:

- Go to **AEM Start → Tools → Security → Groups**.
- Find **"Dev Author"** group and open it.

- Ensure the three users are **added**.

- Check **Permissions:**

    o Go to **/useradmin** (http://localhost:4502/useradmin). o Select the group and verify

      Read access is set for /content and /dam.

    o Ensure **Replication Access** is enabled under **Replicator Permissions**.

Test Permissions by Logging in as a User in the Group

- Login with one of the created users.

- Try to **view** a page under /content and an asset in /dam.

- Try **editing** or **deleting** content (should be restricted).

- Try **replicating** content (should be allowed).
